

**MUHAMMADU BUHARI MAIN LIBRARY, KWARA STATE UNIVERSITY, MALETE,
KWARA STATE, NIGERIA, PRESENTS HER
3RD INTERNATIONAL VIRTUAL CONFERENCE**

Date: Tuesday, 28th of May, 2024

Theme: OPEN ACCESS, ARTIFICIAL INTELLIGENCE (AI), AND BIG DATA

Sub-themes:

- Research Visibility: Leveraging Institutional Repositories (IR) And Search Engine Optimization in the 21st Century.
- Application of Artificial intelligence (AI) for sustainable library services in the 21st century
- Managing library resources in the era of Artificial intelligence (AI) and Big data.
- Quality-controlled knowledge sharing through Open Access resourcefulness.

About the conference:

The Conference aims to bring together foremost faculties, scientists, researchers and information managers, to interchange and share ideas and experiences on all aspects of Open Access, Artificial Intelligence and Big Data towards improving and developing library services in the 21st century.

Learning Outcomes:

This conference will stimulate the ability to apply new knowledge to develop library services, generating new ideas and making valued judgments based on criteria and standards by using information and identifying examples of a given term, concept, or principles and interpreting their meanings to research, library and information services development for best practices in the 21st century.

Expected Participants

Librarians, School Media Specialists, Resource Center Experts, School Administrators, Researchers, Security Experts, Information and Communication Technology Experts, Public Commentators and Post-Graduate Students. (Certificates will be awarded to active participants.)
